House and go two blocks west, and you will see the BEST SUB-URBAN LOTS ever offered for the money.

The value of property, like other commodities, depends upon its value on the relation of supply to the demand. The demand for lots in this section (near Pinner's Point) is very great, and when the present addition is soid it will be impossible to get lots without paying a much higher price than that asked for lots offered by this Company. Six thousand dollars worth of lots soid within last three weeks, on which the street improvements cost, including grading, over \$3,000. The purchasers of lots get the benefit of this improvement. These improvements also insure a good class of buildings, in keeping

with them.

The poor man's credit is as good as the rich man's cash, as we sell lots on the installment plan at the lowest cash prices. We have still a few improved lots as low as \$150, on the installment plan, payments \$10 per month. Everybody knows, and with the exception of those whose interests lie elsewhere, everybody admits that there is no property with such a future as the Port Norfolk section. The rallroads have demonstrated it, as well as contributed to it. Rallroads point the way and are the advance agents of development everywhere—so much the more at their deep water terminals. Here they are concentrating, and here will be the greatest and most substantial growth on the harbor.

"An easy to-day makes a hard to-morrow" is an old proverb, which a little saved and securely invested in Real Estate, where it is sure to grow, is the best way to make the future easy. There is no need to take chances with a certainty in sight.
